SCORPIO EMPIRE INTERNATIONAL

DEFENSE & SECURITY

Civilian UAV Applications

Commercial aerial services for infrastructure inspection, surveying, and environmental monitoring.

Asset inspection

Document roofs, solar installations, facilities, and other accessible infrastructure for maintenance review.

Mapping and surveying

Collect imagery for construction progress tracking, site mapping, and stockpile volume estimates.

Environmental monitoring

Observe vegetation, land use, and changes at restoration or agricultural sites over time.

Discuss your requirements

Share the site, survey area, required imagery or data format, schedule, and any site access restrictions.
